While no work has been done with well other than checking for volume of gas from time to time, I have done considerable map work on the under ground formations.

Expect to deepen well in very near future.

8. I hereby certify that the foregoing is true and correct.

CONTINENTAL CASUALTY COMPANY

Chicago, Illinois

AN ILLINOIS CORPORATION

Power of Attorney Appointing Individual Attorney-in-Fact.

Know All Men by these Presents, That CONTINENTAL CASUALTY COMPANY, a corporation duly organized and existing under the laws of the State of Illinois, and having its principal office in the City of Chicago, and State of Illinois, does hereby make, constitute and appoint FORREST H. ANDERSON

of PHOENIX, ARIZONA

its true and lawful Attorney-in-Fact with full power and authority hereby conferred to sign, seal and execute in its behalf bonds, undertakings and other obligatory instruments of similar nature as follows:

WITHOUT LIMITATIONS

and to bind CONTINENTAL CASUALTY COMPANY thereby as fully and to the same extent as if such instruments were signed by the duly authorized officers of CONTINENTAL CASUALTY COMPANY and all the acts of said Attorney, pursuant to the authority hereby given are hereby ratified and confirmed.

This Power of Attorney is made and executed pursuant to and by authority of the following By-Law duly adopted by the Board of Directors of the Company.

"Article IX—Execution of Documents

Section 3. Appointment of Attorney-in-fact. The President or a Vice President may, from time to time, appoint by written certificates attorneys-in-fact to act in behalf of the Company in the execution of policies of insurance, bonds, undertakings and other obligatory instruments of like nature. Such attorneys-in-fact, subject to the limitations set forth in their respective certificates of authority shall have full power to bind the Company by their signature and execution of any such instruments and to attach the seal of the Company thereto. The President or any Vice President or the Board of Directors may at any time revoke all power and authority previously given to any attorney-in-fact."

This Power of Attorney is signed and sealed by facsimile under and by the authority of the following Resolution adopted by the Board of Directors of the Company at a meeting duly called and held on the 3rd day of April, 1957.

"Resolved, that the signature of the President or a Vice President and the seal of the Company may be affixed by facsimile on any power of attorney granted pursuant to Section 3 of Article IX of the By-Laws, and the signature of the Secretary or an Assistant Secretary and the seal of the Company may be affixed by facsimile to any certificate of any such power and any such power or certificate bearing such facsimile signature and seal shall be valid and binding on the Company. Any such power so executed and sealed and certified by certificate so executed and sealed shall, with respect to any bond or undertaking to which it is attached, continue to be valid and binding on the Company."

In Witness Whereof, CONTINENTAL CASUALTY COMPANY has caused these presents to be signed by its Vice President and its corporate seal to be hereto affixed this 5th day of April, 1961.

Ari-Mass Gas and Oil Co.
Route 2, Box 3
Florence, Arizona

Attention: Mr. E.A. Peters

Re: Ari-Mass Gas and Oil #1
SE NW 8-8S-10E, Pinal Co
Permit 317

Gentlemen:

On December 6, 1966 an extension in which to continue operations on captioned well was granted. This extension expired June 30, 1966.

Inasmuch as no work was commenced, and in view of the fact that this extension was one of numerous extensions, this Commission feels it can no longer consider this an active well nor grant any further extensions.

Consequently this Commission orders that this well be plugged in the following manner:

The hole shall be filled with cement from total depth of 832 feet up to surface. The well shall be properly marked as required in the Rules and Regulations. Location site must be cleaned up.

Plugging Record (Form 10, attached), Well Completion Report (Form 4, attached), copies of all logs, including driller's log, samples, and all other information obtained from the drilling of this well must be filed with this Commission. These plugging operations must be completed with 60 days from date of this order, or September 10, 1967.

Should this well be capable of being made into a water well, your alternative to the plugging of this well would be to

Dear Mr. Peaters:

This will acknowledge receipt of your letter of December 1, 1966 concerning captioned well.

This is to advise that this Commission grants an extension until June 30, 1966 in which to commence further development work on this well. If work has not been commenced prior to that date, this well must be plugged and abandoned; no further extensions will be granted.

If you have any questions would you please advise.

Very truly yours,

John Bannister

Oil & Gas Conservation Commission
State of Arizona,
Phoenix, Arizona.
Att: Mr. John Bannister

Dear Mr. Bannister:

Mr. Walter Smith is still in the East, and has been unable to raise the necessary funds to deepen the well, State #1 Permit 317.

The last time the pump was pulled, it operated for a few days the cylinder is either plugged, or rod has broken, the operating time was not sufficient to determine just what progress if any was made. As I mentioned to you the last time you called at my home, I did not care to pay for any more pulling jobs. However rather than cap this well which I believe will produce, I will pull pump, repair and place back in operation.

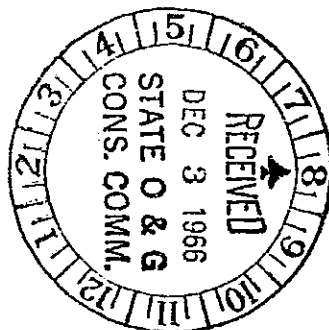

I have been discussing this well with two parties, one from Dallas, the other from Strasburg, Colorado, they are both interested.

I will need an extension of time, as I am not sure my loan will go through before sometime in January.

Thanking you for your consideration.

Very truly yours,

E. A. Peters

Dear Mr. Peters:

This will acknowledge receipt of your letter of June 29, 1966 whereby you advise us of your intention concerning further work on this well and requesting an extension of time in which to commence this work.

This is to advise that this Commission grants an extension until December 31, 1966 in which to commence further development work on this well.

As you are aware, it is the desire of this Commission to cooperate in all manner possible with operators, but this must be done within the framework of our Rules and Regulations. Consequently, if work is unable to proceed on or before the date set forth above, the Commission has no alternative but to order this well plugged.

If you have any questions would you please advise.

Florence, Arizona
June 29th, 1966

Arizona Oil and Gas Conservation Commission,
Phoenix, Arizona.

Att: Mr. John Bannister

Dear Mr. Bannister:

Replying to your letter of the 28th regarding the
Ari-Mass Gas and Oil #1 State.

You probably recall our conversation of two weeks ago at
my home, when I stated that we intended to deepen this
well as soon as possible, that finance was needed.

I discussed this matter with Walter Smith yesterday and
he is leaving for the East in near future and will arrange
for the finance to go ahead with this project.

While nothing noticeable has been done at well, I have done
donsiderable work on the under ground formations.

I still have the confidence that this well will come in,
the State has nothing to lose in bearing with us, while our
project may be slow, we are not giving up.

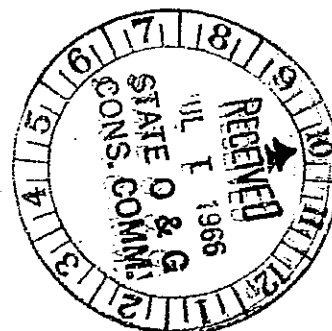

A definite date of resuming operations depends on time needed
by Walter Smith.

In checking the well I feel confident that we have a slight
increase in gas.

I hope this information satisfies the Commission that we have
not dis-continued operations.

Very truly yours,

E. A. Peters

Permit 317

Dear Mr. Peters:

According to our records no work has been done on the captioned well during the months of May and June of the current year.

According to our Rule 202.B, when operations have been suspended for 60 days or more, the well must be plugged and abandoned unless specific permission is obtained from this Commission for temporary abandonment. Consequently, if you do not obtain permission to extend operations on this well, this office will have no alternative but to order this well plugged.

Should you desire to keep this well open, it will be necessary for you to write this Commission stating your full intentions and approximate date of resuming operations on this well.

Should you have any questions, would you please advise.

Permit 317

Dear Mr. Peters:

This will acknowledge receipt of your Sundry Notices and Report dated June 30, 1966, stating "no activity in June." Your previous report, dated May 1, 1966, covered activities during the month of April. Therefore, this Commission still must have a report detailing the activity on this well during the month of May, 1966.

In addition, if during June, 1966, you do have some activity, testing, etc., we will need a supplemental report for June detailing this activity.

Very truly yours,

John Bannister

Permit 317

Gentlemen:

As you are aware, a report is to be submitted to this Commission each month detailing the activities and the progress of operations during the previous month. In addition, we should be notified when a well is to be tested or logged, and the results should be reported at that time, whether or not it coincides with the monthly report.

We have received generalized reports, the last one dated January 30, 1966. We have not received the results of the tests made on this well. In order to bring yourself into conformance with our Rules and Regulations, will you please forward this information.

Further, if operations are suspended for a period in excess of 60 days, it is necessary, in accordance with our Rules and Regulations, that this hole be plugged unless written permission is secured from this Commission for this temporary abandonment.

Your earliest cooperation will be appreciated.

Very truly yours,

John Bannister

Sample No. 49755

Dear Jim:

I have examined the "potash" sample that you sent to me. The two major components are calcite and silica. The silica is in the form of fragile opaline particles. Although surely sedimentary in origin I would hesitate to reconstruct the depositional environment.

We've loaned out a couple of sets of samples recently. Looks like we can be of some service in this area.

Would you please see if you can scrape up some basic data on a hole referred to as Eastern Petroleum - Pausell's #1? If there is such a hole we'd like location, date drilled, T. D., Coconino top if available, and elevation. I'm going on vacation for most of August so please reply to Michael McAllister, c/o H. W. Peirce, etc.

I've begun a compilation of data preparing for publication that will explain what we have available in the way of drill hole information. Sooner or later I will get together with you folks to see how inclusive we should be. We probably should indicate the availability of information at Flagstaff, Phoenix, etc. To my way of thinking we could include some text, maps, and diagrams illustrating or summarizing certain aspects of drilling in Arizona. You know, how many square miles per hole, how many holes to Precambrian, Paleozoic, etc., a bibliography and such other details that seem useful. I will provide more details when I have formulated a tentative outline.

Very sincerely,

Wes

Dear Wes:

I am sending you under separate cover a little package containing a sample of mud taken from the pit east of the Ari-Mass location, roughly fifteen miles south of Florence on the east flank of the Picacho Mountains.

They are drilling there with a cable tool rig at 475 feet and think that they may have hit some potash.

I rather doubt it myself, but just to keep in the clear, I wonder if you could see that this sample is analyzed.

Hope you are having a nice summer. Best regards.

I visited this well July 1, 1965. A proper sign has been erected. The well is being drilled by Chester Carter, a drilling contractor from Coolidge, Arizona.

The total depth of this well at this time was 420 feet. 8-inch casing had been run to 385 feet and set with 32 sacks of cement. They were waiting for cement at this time.

Water was encountered at 282 feet.
